## Infrared Hair Remedy Iron: For Oway Hair Rebuilding Treatments

### Quick Start Guide

**First**, remove iron from the packaging and connect the adapter to the iron electrical cord. Plug Iron in.

**Then**, With the iron turned on, test the iron by putting several drops of cold water on the silver plate and close or click the plate 1-2 times (slight clicking sound from plates closing together) and you should see some misting occur. This is normal and means both the Infrared and Ultrasonic functions are working properly. When the plates are closed together for more than 10 seconds, the Ultrasonic feature automatically turns off. It will turn back on when the plates are opened and then closed down onto the hair again. (The iron will be slightly warm but not hot to the touch.)

**Next**, it's time to analyze the hair and determine the appropriate custom blend for the hair to be treated by consulting the chart below:

*\*Note, there are two different sides to the Infrared Iron. One side is the Infrared (red) side, and the other is the Ultrasonic side with the silver metal plate. The Infrared Iron can be used to penetrate any number of conditioner and nutrients in to the hair. This quick start guide is instruction on how to perform Hair Rebuilding Treatments using the Oway Rebuilding Products protocol. Always follow individual manufacturer instructions.*

	HAIR CONDITION	OBJECTIVE	SHORT HAIR	MEDIUM-LONG HAIR	NUMBER OF SESSIONS	COSMETIC RESULT
A	DRY, DAMAGED AND DULL HAIR WITH LITTLE ELASTICITY	TO GIVE MOISTURIZING AND REMINERALISATION	30 ML REBUILDING SERUM + 2-3 DROPPER APPLICATORS HYALOMINERALS 	60 ML REBUILDING SERUM + 5-6 DROPPER APPLICATORS HYALOMINERALS 	3-4	SOFTNESS MOISTURIZING ELASTICITY SHINE
B	HAIR WITH SPLIT ENDS, PARTICULARLY DAMAGED BY CHEMICAL TREATMENTS	TO INCREASE THE HAIR RESISTANCE TO RECOMPACT SPLIT ENDS	30 ML REBUILDING SERUM + 1-2 DROPPER APPLICATORS CERAMIDES F + 1-2 DROPPER APPLICATORS HYALOMINERALS 	60 ML REBUILDING SERUM + 2-3 DROPPER APPLICATORS CERAMIDES F + 2-3 DROPPER APPLICATORS HYALOMINERALS 	5-6	COMPOSITION RESISTANCE SOFTNESS ELASTICITY SHEEN

- Once you have analyzed the client's hair, proceed with mixing the custom blend Rebuilding Treatment based on the clients hair length.
- Now you can proceed with the application.

## Application of the Intensive Repair Treatment

- 1) Apply the custom blended Repair Treatment to dry hair, section by section, working up the head from the nape. Massage into the hair with hands in an upward movement for better absorption.
- 2) Once the Repair Treatment has been applied to all the hair, you may begin using the iron, section by section, starting in the nape. Clamp the iron over the section of hair and slowly pass over the section to the ends of the hair. Depending on the condition of the hair, **perform 4-6 passes over the section making sure to flip the iron over (alternating with each pass), so that the top and the bottom of the hair strand are treated by both the Infrared and Ultrasonic plates.**
- 3) When all of the hair to be treated has been ironed, let the Repair Treatment rest on the hair for at least 5 minutes. (Do Not Place Under Heat Source)
- 4) Rinse Repair Treatment thoroughly from the hair with lukewarm water.
- 5) Shampoo hair with Rebuilding Hair Bath and leave on for 2-3 minutes. Rinse thoroughly and repeat.
- 6) Apply Rebuilding Hair Mask and spread evenly throughout hair. Leave on for 2-3 minutes for Fine Hair Types, and 3-5 minutes for Thick/Coarse Hair Types. Rinse Thoroughly.
- 7) Complete Service with Oway pre-styling and/or styling products.

**Maintenance:** After completing the recommended number of weekly sessions, repeat the treatment monthly until the hair has been repaired.

*\*\*After exposure to sun, sea, chlorine, salt and sand, and hot temperatures, it is always advisable to use slightly more of the Hyalominerals in your custom blend.*

*\*\*A short cycle of 2-3 Rebuilding Sessions (1 per week) can give support to the hair before having a permanent wave, relaxer, color, or bleaching service.*

*\*\* In the case of very damaged hair, it is advisable to increase the amount of Ceramides F in the first session.*

*\*\* In the case of very dry, dehydrated and dull hair, or curly hair, it is advisable to increase the amount of Hyalominerals in the first session.*
